## Wheels, cool accessories put a new spin on suitcases

Life's on a roll, thanks to innovative new wheeled bags. The following products have been tested by the author and may be available in area stores. Prices do not include shipping.

Wheels away

McKlein R Series bags: Wheels are helpful for lugging heavy loads, but they can make bags heavier and awkward to maneuver in crowded spaces or bad weather. McKlein has an ingenious solution: business cases and backpacks with detachable shells that contain the wheels and retractable pull handles. Use the bag with the wheels when needed; otherwise retract the handle into the shell, unzip the bag from the shell and carry the bag by its handles, shoulder strap or backpack straps. What to do with the shell? Carry it separately in the included nylon cover or put it in a checked bag for use at your destination. Bags are available in leather or ballistic nylon.

McKlein R Series bags with removable wheel/handle shell start at \$150. To find a store, contact McKlein, (877) 625-5346, [www.McKleinUSA.com](http://www.McKleinUSA.com).
