About Us...

McKlein USA is a manufacturer and supplier of business cases, computer cases, catalogue cases, backpacks, luggage, accessories, duffel bags, casual bags, executive writing pads, and custom requests. McKlein USA is something of a revolutionary in the mobile computing and travel goods industries, with showrooms in the United States, Canada, and Thailand. Working with world-renowned brands and corporations for over 25 years has provided a significant knowledge base for understanding the demands of the industry. One of McKlein's key advantages is its 220,000sq. ft state-of-the-art manufacturing facility in Thailand.

The McKlein USA brand was conceived in 1998, by Parinda Saetia, aided by her brother, Chettha Saetia. From its inception, the McKlein USA brand was marked as an architect of progress for mobile designs. The first case the brand engineered was the patented style # 12295 Wheeled Multiple-Access Computer Catalog Case. Since that very first case Chettha Saetia has designed the largest selection of professional wheeled cases, in the world, including: business cases, computer cases, catalogue cases, and backpacks.

In February of 2002, McKlein USA launched the Patented Removable Wheel and Handle System. It was featured in both The New York Times and in The Los Angeles Times. Custom mating zippers allow you to completely remove the Wheel and Handle System from the business case; leaving you with a lightweight, more compact version of the business case. It's essentially two business cases in one, providing more versatility for the mobile professionals than ever before.

McKlein USA has a commitment to provide the best functionality, value and quality to the mobile professional. New products are inspired by the demanding needs with a limited lifetime guarantee. Keep an eye on McKlein USA, while they keep an eye on the future.

Today McKlein offers many stylish bags!
From the Patented 2 in 1 technology:
DAMEN 80714 and GLEN ELLYN 94369

Our factory in Ubon Ratchathani, Thailand
