

TRAVEL

Travel locks are back—but these are the only ones accepted by the TSA

The Certified Travel Locks allows you to lock your luggage again. Perfect for added security, they come with two neon yellow grippers to put on your bag handles so you can notice your luggage easily at baggage claim. The grippers loop around the handles and fasten with Velcro.

Certified Travel Locks SE-3729 \$29.95
Includes two Travel Locks and two grippers.

Atomic Accuracy in a Travel Alarm

For use at home and on the road, this radio-controlled alarm clock folds to 2 1/2" x 3 3/4" x 5/8". One LR44 Alkaline battery (included).

Atomic Travel Alarm SE-2856 \$29.95

NEW!

Wheels on or off, this bag is the newest, easiest way to transport your laptop

If you've ever had to run through an airport at top speed while carrying your laptop, you know how loathsome it can be. It's heavy, awkward and a burden. The Wheels Off Bag takes away that burden by adding wheels, and a telescoping handle, allowing you to navigate through crowds easily. Then, when it's time for a meeting or conference, the bag easily detaches from the wheels so you don't have to carry them with you. Made from full grain Napa Calfskin Leather, this bag features a streamlined business and computer accessory organizer for your cell phone, PDA and other items. Its large, padded main compartment expands to 2 inches to allow for 30% more cargo space, and fits laptops up to 17 inches in diameter. A zipper compartment sports a 3-file divider, while its ABS honeycomb frame construction with 10 mm of thick density foam provides protection and durability. Also comes with a rain/snow cover for maximum protection. Fits in overhead compartments. Weighs 9 pounds. 18" x 8" x 13 1/2"

Wheels Off Bag SE-3818 \$149.95

The bag detaches from the wheeled base for ease of carry.
