Tested Best

Leather Briefcase For Laptop Computers.

This Tested Best two-piece case—an expandable leather briefcase and a separate, removable Laptop Shuttle™—distinguished itself in the two most important testing criteria: protecting the computer inside, and having enough room to bring along the necessities to conduct business while traveling. The Laptop Shuttle holds a computer firmly and safely in place surrounded by two layers of high-density foam, a third polyurethane layer to give it rigid, shock-absorbing flexibility, and a full-grain cowhide leather outer shell for extra protection from water and abrasion. When the Best model's Laptop Shuttle was inserted in the briefcase, thrown 20 times, and had a 25-lb. weight dropped on it four times, its contents emerged undamaged. The expandable outside pocket in the briefcase holds legal-size files, while a separate U-shaped compartment features a leather organizer with pockets for pens, wallet, and cell phone. Padded shoulder strap fits either the briefcase or the Laptop Shuttle separately, and was rated highest for strength. The briefcase is soft, full-grain, drum-died Napa cowhide leather and meets airline carry-on size restrictions. 11 1/2" H x 6 1/2" W (expands to 9 1/2") x 16" L. (5 lbs.) 65739D\$329.95

- Removable Laptop Shuttle can be used alone or with briefcase
- Protected laptop even when struck four times with a 25-pound weight
