Powerlook

Today's laptops are like yesterday's sunglasses. When sunglasses were first invented, nobody cared how they looked; the only thing they were required to do was keep you from squinting. Over time, sunglasses have assumed larger responsibilities. Namely, they have to block ultra-violet rays AND make you look like an unstoppable sex machine. The same product evolution is now taking place with laptops. Laptop designs are

becoming more original and colorful, giving us another means of showcasing our personal style and artistic sense. If you feel like expressing yourself in a cheaper way, get a cool laptop case. Oh, and if you are planning on getting a new laptop, we suggest you take a good look at the list we've compiled and choose the book by its cover. They all basically do the same thing, and we know what's really important in life, don't we? ⁸⁰
